Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The IDS of 12/10/03 has been reviewed and made of record.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

With respect to claims 4 and 11, the examiner cannot find clear support for the phrase "determination means" as recited. Hence the claims are objected to under 37 CFR 1.75 (d) (1). Further elaboration is respectfully requested.

With respect to claims 1 and 8, although the introductory phrases in these independent claims are different, i.e., claim 1 is for a "write device", while claim 8 is for a "read device", since the remaining claim language is identical, the examiner cannot readily ascertain the patentable distinction between these two claims. Further elaboration is respectfully requested.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 4 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In particular, because the examiner fails to find clear support for the noted objected to phrase – see above with respect to "determination means", the description requirement is not met. No art is developed against these claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3,5-10,12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by either Nishikawa or EP 0704841.

The US Patent to Nishikawa is the US equivalent of the EP document. The EP document is relied upon for the reasons stated in the accompanying search report, and hence the US Patent is also relied upon therefore. Note also the description of figure 8 in the US and EP document.

7. Claims 1-3,7-10,14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 05-101420.

As noted in the abstract thereof as identified by the accompanying submitted search report, the limitations of these claims are met. No further analysis is made. No copy of the entire JP document is being sent in this OA.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshio et al – see figures 1-5 and the accompanying disclosure, especially with respect to figure 4. This reference could be relied upon in place of the above documents to meet the claimed limitations (claims 1-3,5-10,12 and 14)

Shinoda et al – see figures 1-3 and the accompanying disclosure thereof. This document could be relied upon in place of the JP document relied upon above in paragraph 7 to meet claims 1-3,7-10 and 14.

Takahashi et al – see figures 1-10 and the accompanying disclosure thereof. This document could be relied upon to meet the limitations of claims 1-3,5,7-10,12 and 14.

Tanaka – see figures 1-8 and the accompanying disclosure thereof. This document could be relied upon to meet the claimed limitations of claims 1-3,5,7-10,12 and 14.
